Price Performance**Source:** CFRA, S&P Global Market Intelligence**Past performance is not an indication of future performance and should not be relied upon as such.**Analysis prepared by **Tuna N. Amobi, CFA, CPA** on Apr 29, 2021 11:41 PM ET, when the stock traded at **USD 3,593.41**.**Highlights**

- We forecast net sales to rise almost 23% in 2021, after 38% growth in 2020, driven by growth in e-commerce (third-party seller services and retail subscriptions versus physical stores) as well as Amazon Web Services (AWS), with further tailwinds for online shopping and cloud computing. The former should benefit from a global ramp-up of the global Prime membership subscriptions (recently surpassing 200 million) on strength across several product categories, including hardware devices (Fire TV, Echo/Dot, Alexa, etc.). We project revenue growth of about 198% in 2022.
- We project a gross margin of 40.3% in 2021, a modest expansion versus 40.0% in 2020, pressured by continued investments in shipping/logistics (including one-day delivery), stores/groceries delivery (including Whole Foods), Prime video content, AWS initiatives (including international expansion), and ratcheted Covid-19 costs. However, with continued favorable shifts in the mix of third-party sellers and continued growth in high-margin advertising revenues, we see gross margin expansion to 41.7% in 2022.
- Including stock-based compensation, after interest/other expenses and taxes, we forecast EPS of \$53.36 in 2021 and \$66.37 in 2022.

Investment Rationale/Risk

- Our opinion reflects expectations for further e-commerce market share gains and potentially sizable upside for the rapidly growing AWS business. With continued momentum through better-than-expected Q1 results, AMZN should further benefit from accelerated secular shifts in global e-commerce and cloud computing, as the Covid-19 lockdown drives structural shifts in consumer behavior and a likely ramp-up of AMZN's free cash flow. Meanwhile, we see further upside to return on ratcheted investments in delivery/fulfillment and video content, likely enhancing the longer-term economics of the Prime membership base. With ample liquidity and financial flexibility, AMZN could sustain a low-double-digit return on invested capital (ROIC) over the long term.
- Risks to our opinion and target price include uncertainties with the full impact of Covid-19; a sharp decline in global consumer spending; intensifying competition in global e-commerce; relatively high earnings volatility; and currency headwinds.
- Our 12-month target price is \$4,000 on price-to-sales of 3.6x our 2022 estimate, relatively attractive versus its internet retail peers and well above AMZN's historical averages given accelerated tailwinds.

Analyst's Risk Assessment

LOW	MEDIUM	HIGH
-----	--------	------

Our risk assessment reflects AMZN's position as one of the global leaders in e-commerce and cloud computing services. While both businesses could also benefit from potential tailwinds arising from extended in-home confinement and increased telecommuting with the onset of Covid-19, the pandemic could result in some disruptions of AMZN's supply chain in domestic and international markets.

Amazon.com, Inc.

Business Summary Apr 29, 2021

CORPORATE OVERVIEW. Since opening for business as “Earth’s Biggest Bookstore” in July 1995, Amazon.com has expanded into a number of other product categories, including apparel, shoes, and jewelry; electronics and computers; movies, music and games; toys, kids and baby; sports and outdoors; home and garden; tools, auto and industrial; grocery; health and beauty; and digital downloads.

AMZN has virtually unlimited online shelf space and can offer customers a vast selection of products through an efficient search and retrieval interface. The company personalizes shopping by recommending items that are likely to interest a particular customer based on previous purchases. Key website features also include editorial and customer reviews, manufacturer product information, secure payment systems, wedding and baby registries, customer wish lists, and the ability to view selected interior pages and search the entire contents of many books.

The company operates the following retail Web sites: www.amazon.com [U.S.], www.amazon.co.uk [U.K.], www.amazon.de [Germany], www.amazon.fr [France], www.amazon.co.jp [Japan], www.amazon.ca [Canada], www.amazon.cn [China], www.amazon.it [Italy], www.amazon.es [Spain], www.amazon.br [Brazil], www.shopbop.com, www.endless.com, and www.zappos.com. Amazon also designs, manufactures, and sells a wireless e-reading device, the Amazon Kindle. It focuses first and foremost on the customer experience by offering a wide selection of merchandise, low prices, and convenience.

In addition to being the seller of record for a broad range of new products, AMZN allows other businesses and individuals to sell new, used, and collectible products on its Web sites through its Merchant and Amazon Marketplace programs. The company earns fixed fees, sales commissions, and/or per-unit activity fees under these programs. AMZN also serves developers and enterprises of all sizes through Amazon Web Services, which provides access to technology infrastructure that developers can use to enable virtually any type of business.

The breakdown of 2020 net sales and operating income by reporting segments are as follows: North America, 61% and 38%; International, 27% and 3%; and Amazon Web Services, AWS 12%, and 59%. The breakdown of 2020 revenues by channels are as follows: online stores, 54%; physical stores, 4%; third-party seller services, 21%; subscriptions services, 7%; Amazon Web Services, 12%; and other, 6%.

In recent years, AMZN has made some notable acquisitions. Most significantly, in August 2017, the company acquired Whole Foods Market [WHM], a leading retailer of natural and organic foods, for \$13.7 billion in cash. More recently, in June 2020, it acquired Zoox, a start-up provider of autonomous vehicles, for about \$1.2 billion. In September 2018, the company acquired PillPack, an online pharmacy company, for about \$753 million. In February 2018, AMZN acquired Ring, a start-up provider of smart home technology applications, for about \$839 million.

PRIMARY BUSINESS DYNAMICS. Amazon’s business is highly intensive in terms of operating and capital expenditures. Over the past several years, the company has significantly ratcheted up its spending to build out its extensive infrastructure for shipping/logistics and delivery/fulfillment. In addition, the company has also heavily invested in other areas such as hardware devices, video content, and international expansion -- including its Amazon Web Services division -- resulting in some barriers to entry. However, AMZN faces intense price competition from bricks and mortar retailers as well as other Internet retailers. Other challenges and weaknesses inherent in Amazon’s business model include low switching costs for consumers when shopping online and search engines that simplify and enable comparison shopping.

Strengths of the company, in our view, include: strong brand name recognition; the breadth and depth of the company’s product lines; a user feedback feature that we think helps to build trust and increase customer loyalty; what we see as a strong balance sheet, with over \$17 billion in cash and marketable securities and no long-term debt; and efficient deployment of capital on technology to help promote a fast, user-friendly shopping experience.

We think the size of the market represents an opportunity for AMZN. In 2020, amid the Covid-19 lockdown, approximately 21.3% of total U.S. retail sales were estimated to be e-commerce transactions, totaling about \$861.1 billion -- an increase of about 44% from the prior year -- according to Digital Commerce 360 (based on analysis of data from the U.S. Department of Commerce). Amazon accounted for more than one-third of U.S. e-commerce sales. Meanwhile, research firm eMarketer expects global e-commerce sales to increase at a 5-year compound annual growth rate [CAGR] of almost 14% to about \$6.39 trillion in 2024 (versus \$3.35 trillion in 2019). Another opportunity is the potential upside on relatively low global Internet penetration of about 64% [as of Q1 2021], according to Internet World Stats, with markedly lower penetration in several emerging market regions versus North America [90%+] and Europe [87%+], likely underscoring the strong potential for increased Internet usage and e-commerce sales abroad.

FINANCIAL TRENDS. By the end of 2020, the company generated a five-year compound annual growth rate [CAGR] of 25.8% in revenues [including acquisitions]. Meanwhile, its gross margins were 39.6% in 2020 versus 41.0% in 2019 (versus 40.2% in 2018, and 37.1% in 2017 and 27.2% in 2013). Partly reflecting the changes in the level of the company’s investments in various growth initiatives, Amazon’s return on capital employed [ROC] has fluctuated dramatically over the years, to 8.3% in 2019 (versus 109.4% in 2018, 4.6% in 2017, and 3.3% in 2013).

Amazon.com, Inc.**Sub-Industry Outlook**

Our near-term fundamental outlook for the Internet retail sub-industry is positive. We see continued disruption by key players such as Amazon, Netflix, and others, as more consumers migrate their shopping and entertainment experiences from traditional retail points of sales and distribution channels to online platforms that are leveraged to technology advancements. Also, while the recent outbreak of Covid-19 could benefit the aforementioned key players via increased in-home video streaming and/or online shopping, the global pandemic could dislodge the e-commerce supply chain in China and elsewhere, and portends a significant negative impact on online travel companies such as Booking Holdings and Expedia.

Research firm eMarketer projects that U.S. e-commerce sales will increase from almost \$587 billion in 2019 to almost \$970 billion by 2023, which implies a four-year compound annual growth rate [CAGR] of 13.4%, more than triple the growth rate for the overall retail space (including brick-and-mortar stores). From a macroeconomic viewpoint, we have a relatively tempered near-term outlook for global consumer spending on such discretionary items as entertainment subscriptions or travel-related online bookings for hotels and airline tickets.

Meanwhile, we think a number of relatively under-penetrated international markets -- both developed and emerging -- could offer even more compelling opportunities for longer-term growth in e-commerce. In part, we think this reflects relatively low broadband penetration across international markets relative to the U.S. To this end, companies such as Amazon are currently pursuing aggressive international expansion in Europe and the Asia Pacific, mainly through organic growth initiatives. Yet, other firms, including online travel companies, such as Booking Holdings and Expedia, generate a very sizable portion of revenues and operating cash flow from international markets, thanks in part to a streak of acquisitions over the past few years. Further M&A activity could be on the horizon, after

Amazon's recent deals for Whole Foods and PillPack, which could result in further industry consolidation among the top players.

From an industry perspective, online merchants typically provide consumers with a relatively strong combination of convenience, selection, information, and value compared to off-line competitors, based on our channel checks and analysis. Amid intensifying competition in the online space, e-commerce leader Amazon is also expanding its private-label offerings, while further expanding into new product and service categories in the face of intensifying competition from specialty online retailers such as Wayfair, Etsy, and others.

Advancements in technology have made e-commerce transactions easier to complete and more reliable and secure, helping to drive sales, we think. Conversely, heavy infrastructure investments in technology and fulfillment -- including further expansion across emerging international markets such as India -- could weigh on reported earnings. However, continued strength in the U.S. dollar could result in persistent foreign currency headwinds for an Internet retail universe with sizable (and growing) international exposure.

In 2020, the S&P Internet & Direct Marketing Retail Index advanced 69.1%, significantly outpacing a 15.8% increase the S&P Composite 1500 Index. In 2019, the sub-industry rose 21.4% versus a 28.3% advance for the broader market benchmark.

Analyst Research Notes and other Company News

May 26, 2021

09:54 AM ET... CFRA Keeps Buy Opinion on Shares of Amazon.com [AMZN 3264.53****]:

After much speculation, AMZN officially enters into a definitive agreement to acquire MGM Studios for \$8.45 billion, in what would be its 2nd largest ever acquisition (Whole Foods). Despite a seemingly ample premium for MGM, we think the potential deal further highlights the "content arms race" amid intensifying streaming wars as the latest catalyst for industry consolidation. With a deep library of some 4,000+ film titles and 17,000+ TV episodes, the storied Hollywood studio would provide a major boost for Amazon Prime Video as a key element of its rapidly growing Prime membership subscriptions. This comes as the company faces its first antitrust lawsuit in the U.S. by the DC Attorney General alleging that AMZN prevents its third party sellers from offering lower prices on any other platform, creating an "artificially high price floor". Still, a potentially heightened regulatory scrutiny of AMZN's e-commerce business is unlikely to scuttle the MGM deal, even as the parties offered no target closing date. / Tuna N. Amobi, CFA, CPA

May 26, 2021

09:18 AM ET... CFRA Keeps Buy Opinion on Shares of Amazon.com [AMZN 3264.00****]:

In the first antitrust lawsuit against the company in the U.S., the DC Attorney General (AG) alleges that AMZN prevents its third party sellers from offering lower prices on any other platform, creating an "artificially high price floor." The suit seems to rekindle some concerns with AMZN's "price parity" provision under the so-called MFN (most favored nation) agreements, now subsumed into its "fair pricing" policy. With AMZN already facing an antitrust probe by the Federal Trade Commission in concert with the AGs of NY and CA on the heels of last fall's unflattering report on its pricing pacts by the House Judiciary subcommittee, we see some headline risk that could open the door to further regulatory scrutiny. Still, given a relatively limited scope and a somewhat high bar for a likely protracted case that could traverse some antitrust gray areas, the lawsuit is unlikely to pose a near-term material financial risk, with the potential for a business model adjustment seen as a worse-case scenario. / Tuna N. Amobi, CFA, CPA

May 25, 2021

12:14 PM ET... CFRA Keeps Buy on Shares of Amazon.com, Inc. [AMZN 3242.99****]: AMZN could be close to a deal to acquire movie studio MGM for about \$9B (including debt) as per an unconfirmed Wall Street Journal report (following other trade reports last week), in what would be its second-largest acquisition (after Whole Foods). While the reported price tag seems rather lofty, we think the potential deal highlights the "content arms race" amid intensifying streaming wars as the latest catalyst for industry consolidation. With a deep library of some 4,000+ film titles (including James Bond, The Hobbit, and Pink Panther franchises) and 17,000+ TV episodes (including Stargate, Vikings, The Voice, and Survivor), the storied Hollywood studio would provide a major boost for Amazon Prime Video, which recently locked in long-term streaming rights to NFL Thursday Night Football. AMZN recently surpassed 200M Prime members worldwide, of which about 175M streamed its Prime Video content in the past year. In 2020, AMZN spent \$11B+ on TV series, movies, and music for its Prime services, up 41% Y/Y. / Tuna N. Amobi, CFA, CPA

May 18, 2021

12:06 AM ET... CFRA Keeps Buy Opinion on Shares of Amazon.com, Inc. [AMZN 3278.50****]: AMZN could be in advanced talks to acquire movie studio MGM for about \$9 billion, according to an unconfirmed report by Variety (or within a range of \$7 billion to \$10 billion as initially reported by The Information). Despite some questions about MGM's current valuation, a potential acquisition of the storied Hollywood studio would offer access to a deep trove of a library with 4,000+ film titles (including the James Bond, Hobbit and Pink Panther franchises) and some 17,000 TV episodes (including the Stargate series, Vikings, The Voice and Survivor). Amid intensifying streaming competition, the deal should provide a major boost for Amazon Prime Video, which recently locked in the steaming rights to NFL Thursday Night Football through the 2033 season. Of note, AMZN recently said it surpassed 200 million Prime members worldwide, of which about 175 million streamed its Prime Video content in the past year. In 2020, AMZN spent about \$11 billion on TV series, movies and music for its Prime services, up 41%, Y/Y. / Tuna N. Amobi, CFA, CPA

April 29, 2021

05:38 PM ET... CFRA Keeps Buy Opinion on Shares of Amazon.com, Inc. [AMZN 3605.91****]:

We raise our 12-month target by \$200 to \$4,000 on '22 price-to-sales of 3.6x, seen attractive vs. peers. We raise our '21 EPS estimate by \$8.06 to \$53.36 and '22's by \$2.29 to \$66.37. AMZN's better-than-expected Q1 results and Q2 guidance (factoring in '21 Prime Day) underscores accelerated shifts in global e-commerce and cloud computing on Covid-19 demand tailwinds, having surpassed 200M global Prime members while Amazon Web Services (AWS) holds up against intensifying competition. Q1 EPS of \$15.79 vs. \$5.01 was \$6.15 above consensus. Net sales rose 44% [vs. target 33%-40%] mostly on e-commerce growth, including online stores, third-party seller services, and retail subscriptions (up 44%, 64%, and 36%), plus AWS (up 32%) and other including ads (up 77%). With further AWS margin expansion (70 basis points), consolidated EBIT was \$8.9B [vs. \$3.0B- \$6.0B], after added Covid-19 costs of \$2B (\$13.5B cumulative). AMZN sees Q2 sales growth of 24%-30% and EBIT of \$4.5B-\$8.0B, after another \$1.5B of Covid-19 costs. / Tuna N. Amobi, CFA, CPA

March 19, 2021

12:44 AM ET... CFRA Keeps Buy Opinion on Shares of Amazon.com, Inc. [AMZN 3037.00****]:

Amazon Prime Video has secured global streaming rights to the NFL Thursday Night Football (TNF) package through the 2033 season. This comes as the NFL reached new comprehensive broadcast rights deals with its media partners, valued at more than \$110 billion over 11 years starting from the 2023 season. AMZN's latest deal notably marks a first for a streaming platform to exclusively offer the full roster of 15 TNF games, which hitherto had only 11 games that were simulcast on Fox network. The reported price tag of about \$1 billion a year on AMZN's latest deal seems like a steep climb from the \$75 million to \$100 million annual tag on the last renewal through the 2019 season, and particularly the \$50 million tag at inception in 2017 when AMZN initially secured those rights. Still, the expanded pact could be a potential game changer that lends further impetus for continued strong growth in global Amazon Prime membership subscriptions, providing further differentiation amid intensifying streaming wars. / Tuna N. Amobi, CFA, CPA

February 02, 2021

06:11 PM ET... CFRA Keeps Buy Opinion on Shares of Amazon.com, Inc. [AMZN 3410.10****]:

We raise our 12-month target price by \$200 to \$3,800 on '21 price-to-sales of 4.2x, ample vs. peers. We raise '21 EPS estimate by \$0.91 to \$45.30 and set '22's at \$64.08. AMZN says its CEO Jeff Bezos will transition into Executive Chairman by Q3, to be replaced by Andy Jassy, who has led its Amazon Web Services (AWS) unit since inception. The news is surprising but seems logical to lay the groundwork for succession. Meanwhile, AMZN's better-than-expected Q4 '20 and Q1 '21 guidance underscore accelerated shifts in global e-commerce and cloud computing on Covid-19 demand tailwinds. Q4 EPS of \$14.09 vs. \$6.47 was \$7.06 above consensus. Net sales rose 44% [vs. target 28%-38%] mostly on e-commerce growth, including online stores, third-party seller services and retail subscriptions (up 46%, 57% and 35%), plus AWS (up 28%). With further margin expansion, consolidated EBIT was \$6.9B [vs. \$1.0B- \$4.5B] after \$4.0B of Covid-19 costs. AMZN sees Q1 sales up 33%-40% and EBIT of \$3.0B-\$6.5B, after \$2.0B of Covid-19 costs / Tuna N. Amobi, CFA, CPA

Amazon.com, Inc.**Glossary****STARS**

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index [MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index]], based on a 12-month time horizon. STARS was designed to meet the needs of investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share [EPS] estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

 ROCE - Return on Capital Employed
 ROE Return on Equity
 ROI - Return on Investment
 ROIC - Return on Invested Capital
 ROA - Return on Assets
 SG&A - Selling, General & Administrative Expenses
 SOTP - Sum-of-The-Parts
 WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes [paid in the country of origin].**Qualitative Risk Assessment**

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:**★★★★★ 5-STARS (Strong Buy):**

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Disclosures

S&P GLOBAL™ is used under license. The owner of this trademark is S&P Global Inc. or its affiliate, which are not affiliated with CFRA Research or the author of this content. Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS recommendations are determined and assigned by equity analysts. For reports containing STARS recommendations refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative recommendations are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five (six) model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative recommendations refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports (collectively, the "Research Reports") reflect different criteria, assumptions and analytical methods and may have differing recommendations. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views or recommendations on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.

STARS Stock Reports:

Global STARS Distribution as of June 28, 2019

Ranking	North America	Europe	Asia	Global
Buy	34.4%	29.0%	41.1%	33.5%
Hold	56.1%	54.8%	46.4%	54.6%
Sell	10.5%	16.2%	12.5%	11.9%
Total	100.0%	100.0%	100.0%	100.0%
