CFRA KEEPS BUY OPINION ON SHARES OF AMAZON.COM INC.

Recent Price : **\$1208.4999**

Recommendation:

With AMZN again seen poised to garner the lion's share of another likely record Cyber Monday, raise our 12-month target price by \$175 to \$1,350, on '18 price-to-sales of 2.9X, seen attractive vs. Internet retail peers. With Thanksgiving and Black Friday online sales already up a solid 18% to a record \$7.9B, per Adobe Digital Insights, this Cyber Monday is projected on a similar growth trajectory to a new record of \$6.6B. Meanwhile, total e-commerce sales for the '17 November-December holiday season is seen up 17% to \$107B (about 11% of total holiday retail sales), per eMarketer.
